LLOYD'S REG.
LONDON.

RECD. 17 NOV 1902

ANSR.

Genoa November 14th 1902

Sir

Referring to my report No 2702 on the S.S. "monviso," I beg leave to inform you that the safety valves of the main boilers were adjusted by me under steam to 185 lbs per square inch, the working pressure being 180 lbs. The safety valves are fitted with easing gear, & the smallest distance of boilers or upstalls & bulkheads or woodwork is 18 inches. I regret that these particulars were inadvertently omitted from my report.

I am Sir

Your obedient servant
Maurice Ritson

The Secretary
Lloyd's Register
London.
