

Lloyd's Register of British & Foreign Shipping,

It is submitted that the corrected tonnage should be written upon the classification certificate of the ^{new} S.S. "Graf Tizza Istrien" as requested by the builders.

The alterations by which the tonnage of this vessel has been increased were made after the survey was completed and the survey fees collected. They consist in closing spaces which were previously open and therefore unmeasured, and the amount of tonnage added is 290 tons - being 261 tons on account of the bridge house and 29 tons on account of the poop.

It is submitted that under these circumstances no additional fees should be applied for in this case.
