Botanicuslaan No. 23,

Haren-Groningen, The 27th of May 1938.

LLOYD'S REGISTER  
Received  
30 MAY 1938  
Amd.  
LONDON

Fees Paid

Dear Sir,

In reply to your classing-letter of the 24th inst. regarding the marks of identification of intermediate shaft of the M.V. "PEGRIX" I beg to state that the shaft of 190 mm. diam. marked 2554 HB-12.7.37 refert to in the Düsseldorf Surveyor's Report No. 190 is a short shaft between the flywheel and the thrustshaft. The intermediate shaft of 155 mm. diam. marked 390 HS-LW 26438 is the shaft between the thrustshaft and the screwshaft. That short intermediate shaft is always delivered with the engine, while this has to be used when the engine is tried on the testbed.

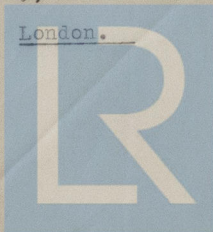

I am, Dear Sir,

Yours faithfully, -

*L. H. Wehrmeyer*

The Secretary,

London.
