

Steel screw tug "SWAN"

This vessel is classed ~~SA~~Al, For River Towing Services in the Malay Peninsula. She is of 25 tons gross.

The Society's Surveyor at Penang, to which port it was understood the vessel proceeds in December of each year for overhaul and survey, was advised on the 24th December that the screw shaft survey became due last May and had not been held.

In reply to this letter the Surveyor states that the shaft was examined by him on the 18th December when the Annual Passenger Certificate Survey was held.

The Owners, however, informed him that it was not their intention to have the vessel classed in Lloyds.

It is submitted for consideration whether the vessel's class should now be omitted from the reprint of the Register Book.
