Port of Registry

W1126-0098

s.s. "COULBEG"

The construction of this vessel was commenced in September 1929. She was launched in August 1936 and completed in September 1936.

Mr. Warlow asks, in view of the above, whether it would be desirable to make some special notation in the Register Book. He refers to the case of the similar vessel "COULMORE", which was commenced in June 1929, launched in May <sup>1936</sup> ~~1929~~ and completed in June 1936, the date of build being recorded in the Register Book as June 1936.

The case of the "COULMORE" is parallel to that of the "COULBEG", and it is submitted that the usual practice be followed and that the last visit of the Surveyor be recorded as the date of build, namely September 1936.
