Port of Registry West Hartlepool

Survey Due Screwshaft Survey due 5,41.  
(Special Survey No.1 due 5,42)

The Owners write that when this vessel was drydocked at Liverpool in February last they endeavoured to have the screwshaft drawn for examination but could not obtain the necessary authority.

They state that the vessel is at present allocated to the Sea Transport Service and is expected to dock at Talcahuano early next month. The Owners consider that even if facilities for drawing the shaft are available at that port it would not be advisable to carry out the survey there and desire to be allowed to postpone the withdrawal of the shaft until the vessel is again drydocked.

They further add that they anticipate the vessel will return to this country about the end of the present year when she will certainly be drydocked.

*Submitted action be deferred on the understanding that the shaft, or the shaft cone, is examined at the earliest opportunity, possibly at Talcahuano*
