N^o 413. Boilers

Dear Sirs,

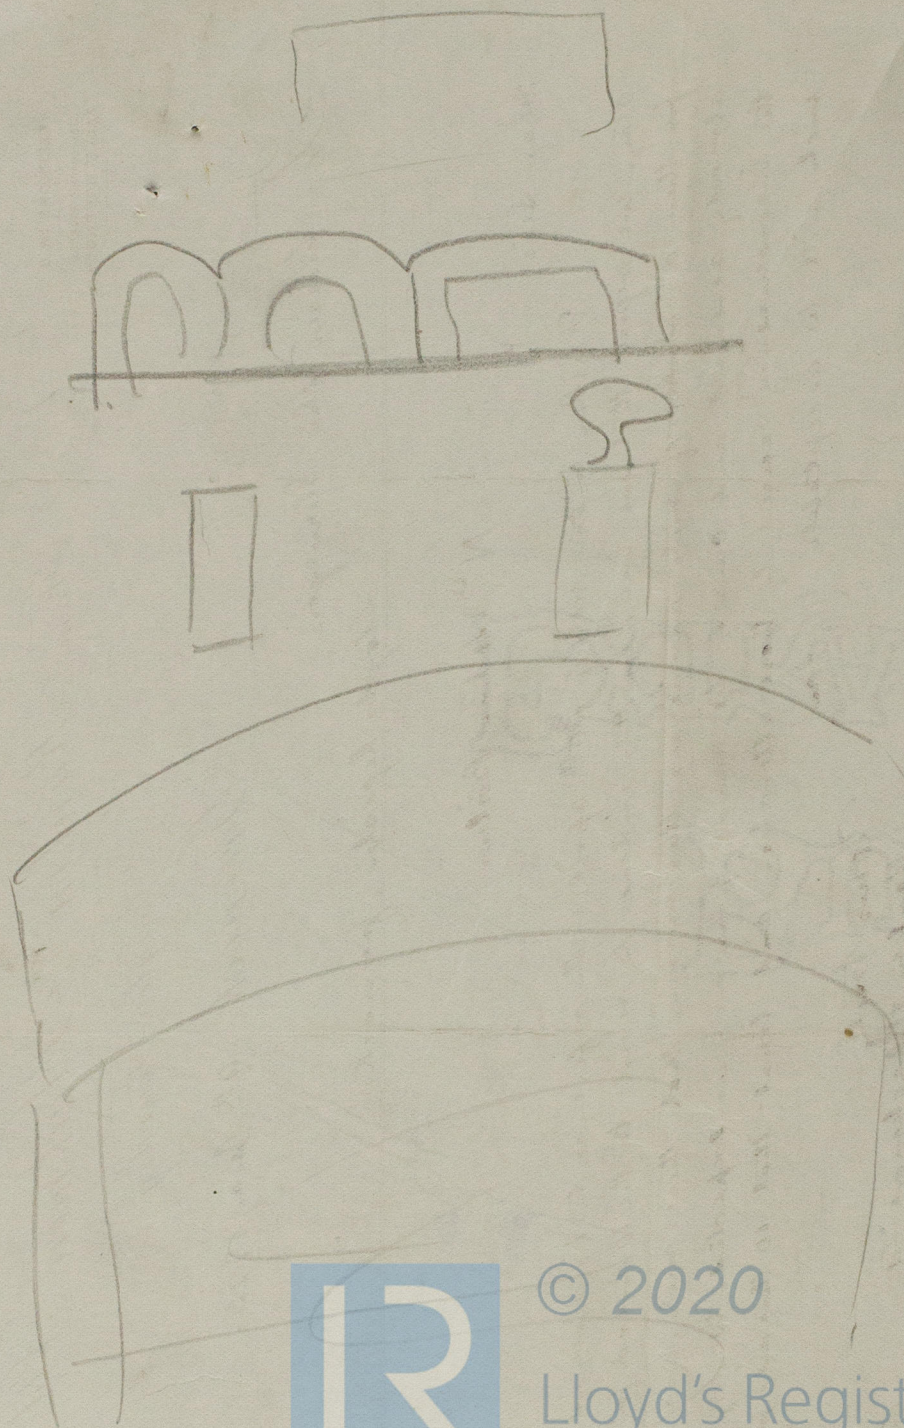

Further to our note of 30th April with reference to 1⁵/₈ screwed stays we regret that we have in this instance to revert to the 10 thread pitch for them as makers of nuts advise us this morning that these nuts are already screwed and cannot be made 9 threads as expected. We regret the inconvenience caused by these alterations and trust that 10 threads per inch will be acceptable to you.
