

Boiler  
endorsement

W1157-0153

Shipbuilders: Messrs. LITHGOWS LTD.

Yard No. 928

Makers: Messrs. BARCLAY CURLE & Co

Boiler No 674 & EW124

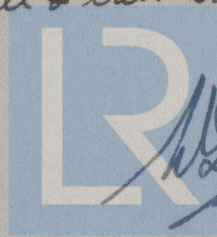

It is submitted that the plan of cylindrical oil-fired & ex-haust heat boiler merits approval for a working pressure of 120 lbs per sq. inch, provided the boiler be constructed under the usual conditions of survey and testing.

The Steel Testing Surveyors should be advised regarding the tensile strength of the shell & butt straps viz:- 29-33 tons
