S.S. "EVANGELOS"

Mr. Lambert has called here to-day and stated that to the best of his belief the double bottom in this Steamer, as also in the sister vessel, the "WAR SNIPER" now "MEANDROS" built by the Hong Kong & Whampoa Dock Co. were both fitted for the carriage of oil fuel. He is of opinion that the centre girder in each case was made reasonably watertight.

As, however, the double bottom tanks of the Steamer "EVANGELOS" were dealt with by his Assistant, Mr. Stewart, who is at present in this country, he is communicating with Mr. Stewart on the subject, and as soon as a reply is received, he will communicate or call again at this Office.
