Dear Sirs,

s/s "CORABELLA".

We have your letter of the 18th inst. and await with interest your further information.

We have written the Builders and are hoping to confer with them this week in regard to very serious vibration at the after end of the vessel, noticeable particularly from the crew's quarters. We have requested Builders for details of the Test of the stern frame sole piece, but they state that they have not this information. Perhaps you will kindly advise us of the tensile the material was required to be and - if possible - a copy of the Test Certificate.

Yours faithfully,

Bushell Nicol & Co.
