# Lloyd's Register of Shipping.

Port GLASGOW,

3rd December, 1929.

GLASGOW REPORT No 49915

**This is to Certify** that

J. L. MANSON

the undersigned Surveyor to this Society did at the request of Messrs. Charles McNeil, Ltd., of Glasgow, survey during construction a riveted steel Air Receiver 6'9" diameter by 17'0" long to the order of Messrs. Armstrong, Whitworth & Co., of Newcastle, for their Vessel No. 1048.

The material has been tested by the Surveyors to Lloyd's Register: the scantlings are in accordance with the Society's Rules for a working pressure of 215 lbs. per square inch, and the workmanship is good.

The Receiver having been tested in my presence on the 2nd August 1929 by hydraulic pressure to 430 lbs. per square inch, showed no signs of weakness and was found tight and sound in every respect at that pressure.

Working pressure not to exceed two hundred and fifteen pounds per square inch.

*J. L. Manson*  
Surveyor to Lloyd's Register.

This certificate is issued upon the terms of the Rules and Regulations of the Society, which provide that:—  
The Committee use their best endeavours to ensure that the functions of the Society are properly executed, it is not intended that neither the Committee nor the Society are under any circumstances whatever to be held responsible for any error in any report or certificate issued by the Society or its Surveyors, or in any entry in the Register Book or other publication of the Society, or for any error of judgment, default, or negligence of the Surveyors, or other Officers or Agents of the Society.
