16 JAN 1942

SURVEY REPORT.

PORT PIRIE.

1st November 1941.

This is to certify that J. C. PLAYFAIR, Engineer Surveyor, did at the request of GEORGE WILLS & CO., LTD., Lloyd's Agents, proceed on board the Norwegian Motor Vessel "THERMOPYLAE" for the purpose of surveying Donkey Boiler and Tunnel Bearings.

I have to report that I examined all Tunnel Bearings both Port and Starboard and found same to be in perfect condition. I also set the safety valve on the Donkey Boiler at 108 pounds per square inch, the size of the washers being 33/64ths of an inch.

I therefore recommend that the vessel be granted a certificate of Survey covering the above.

(Sgd.) J. C. PLAYFAIR
Engineer Surveyor to Lloyd's Agents.
