

Messrs. Cammell Laird & Co's Yard No.1054, oil tanker
building under the Emergency S.B.Programme

(Alteration to M.L.C. barrier)

It is submitted the Liverpool Surveyors be informed that the statement of modifications to this vessel, forwarded with their letter, has been examined. It is considered that the Surveyors need not concern themselves with the fitting of the various items mentioned in the statement, but should confine themselves to seeing that, in carrying out these modifications, nothing is done to the structure of the ship to which they would necessarily be obliged to take exception.
