Lloyd's Register of Shipping,

71, Fenchurch Street, E.C. 3.

9th November, 1927.

Dear Sirs,

With reference to Mr. Kirkley's First Entry Report No.626 on the Steel Twin Screw Motorship "ITAPAGE", Chantiers de Normandie's Yard No.P5, I have to request that you will state the size and spacing of the poop and forecastle deck beams, the spacing of the third deck beams, whether the side girder is fitted in the double bottom tanks as approved, the height of the tank side brackets and the tests for the stream wire.

I shall also be glad if you will forward a copy of the plan of midship section of the vessel as built, the forging report for the rudder, and a sketch showing the position, length and capacities of the deep and other tanks.

I am, Dear Sirs,

Yours faithfully,

The Surveyors,  
ROUEN.
