

Messrs. The Furness Shipbuilding Co's No. 283.  
-----

Stern frame.

This case is fully stated in endorsement dated 1.2.38.

It is submitted the Builders be informed that the dimensions of the boss of the stern frame as made have been carefully noted from the sketches forwarded, and provided the hole for the shaft, 26" diameter at the after end and 26.1/16" diameter at the forward end, be bored in the centre of the boss, the shell plating on the boss be increased to .88" in thickness and riveted to the boss to the Surveyors' satisfaction, the stern frame as made will be accepted, subject, as intimated in the Secretary's letter of the 1st instant, to the Owners' consent being obtained.

The plans forwarded have been retained for record.

*P. 21.2.38  
Recd. 26.2.38  
2 plans retained.*
