

Messrs. The Furness Shipbuilding Co's No.283.

Eagle Oil Tanker.

Plans of stern frame and rudder submitted, in triplicate, by the Middlesbrough Surveyors.

It is submitted the Surveyors be informed that the scantlings and arrangements as shewn and amended will be approved, provided they be carried out to their satisfaction.

With regard to the communication from the Owners quoted in the Builders' letter, the Surveyors should explain to the Builders that recent experience has shewn that it is essential that all discontinuities should be minimised as far as practicable, and that some increase should be made to the scantlings of the stern frame in the vicinity of the upper gudgeon, and particularly immediately below the counter, and the plan has been suitably amended in this respect.

It should be added that the Owners' representative has called at this Office and discussed this matter, as arranged.

*R. 14. 4. 37
