

tug "KEVERNE". Boiler Survey due 7,31.

This matter is dealt with in the endorsement dated the 28th January 1932.

The Owners have now forwarded a copy of a report of a survey of the boiler carried out in June 1931 by an Inspector to the National Boiler & General Insurance Co., Ltd., and they express their regret that through inadvertence the Society's Surveyors were not notified at that time.

They propose to carry out the survey at Rochester during March or at latest in April.

From the report it appears that the boiler was in efficient condition in June last and in view of this it is submitted the Owners' proposal be approved, subject to the arrangement being adhered to without fail.
