

S.S. "WEST CARUTH".

Equipment No. 35865, Letter "z".

This vessel was classed with the American Bureau, and is now under survey at Rotterdam with a view to class with this Society.

The Rotterdam Surveyors have forwarded certificates for three stockless bower anchors and one stockless stream anchor issued by the American Bureau, and one certificate for stud chain cable issued by the American Bureau. They also send four certificates for stud chain cable issued by this Society.

The particulars given on the certificates have been examined, and it is found that the weights of the anchors are in excess of those required by Table 31 of the Rules, that the length and size of the stud chain cable is equal to the Rule requirements, and that the weight is in excess thereof.

In view of the anchors and part of the stud chain cable having been tested by a recognised classification Society, and of the above, the equipment of anchors and cables is submitted for the approval of the Committee.

It is further submitted that provided the remainder of the equipment be found or made in accordance with the requirements of Table 31 of the Rules, the equipment of the vessel might be approved for the Figure 1.
