

COPY.
PORT OF GLASGOW

Enclosure.

12th November, 1912.

Dear Sirs,

Having submitted for the consideration of the Committee the plan of the main boilers No.606 proposed to be made by you, I have to acquaint you that provided the boilers be made in accordance with the plan under the usual conditions of survey and testing and to the entire satisfaction of the local Engineer Surveyor, the same will be approved of by the Committee for the intended working pressure of 180 lbs per square inch.

I have to add that it is considered that the screw stays to the wing combustion chambers should be ^{made} ~~here~~ more nearly square to the chamber plating as indicated on the plan.

Please return plan after noting.

I am, Dear Sirs,

Yours faithfully,

Messrs. David Rowan & Co.Ld.,
Elliott Street,
Glasgow.
