~~De-l~~  
~~11/1~~

30th September, 1919.

Dear Sir,

With reference to your first entry reports on the Steel Drifters "FURY", "BOW WAVE", "GLOSS" and "BLUE HAZE" I have to say that it is concluded that the deck plating is .32" to .30" in thickness, as shown on the approved plan, but you will be good enough to confirm this.

I have also to point out that in the case of the "GLOSS", the frame spacing aft is given as 20g and as 20 forward, and it is concluded that this is a clerical error and should be aft 20 and forward 20g, as in the cases of the sister vessels, the figures on the report having been transposed in this instance.

I am, Dear Sir,  
Yours faithfully,

Assistant to the Secretary.

Mr. A. E. Farnham,

IPSWICH.
