

s.s. "KOEPIA"

It is submitted Mr. Achille Laure be informed it is noted that the fore peak will not now be used as a tank, consequently a wash plate for it will not now be required.

It is also noted that the after peak will be used for fresh water, and if this tank is to be kept either full or empty while the steamer is at sea a washplate will not be required for this tank, but if the tank may be partially empty at sea a washplate will be required in accordance with the Committee's usual practice. No objection will be taken to the parts of this washplate being as small as possible, and consistent with satisfactory workmanship in order to avoid any unnecessary disturbance of the plating forming the crown of the tank.

On 23/10/24
and 27th.
