" Koefia " - Classification - With regard to the classification of the
above steamer at Lloyd's, we are informed by your surveyor at this po-
rt that efficient wash plates must be fitted in the fore and after
peak if same are to be used as tanks.
Such work is very difficult, because shall be necessary to remove the
top plating of the peaks, in order to allow the entrance of the plates,
and we have taken the decision of not use more the fore peak as tank,
for which the wash plate should be fitted only in the after peak.
This one have the capacity of 32 tons and is used for fresh water; it is
necessary to continue to use it as tank and we would beg you to con-
sider if it is possible to substitute the wash plate with other struc-
ture in view of her scarce capacity and difficulties of the work.
All other works (gussets, girders, web frames, pillars, ecc.) are under con-
struction, and we hope steamer will be ready quickly; if the wash plate
shall be fitted the readiness will be necessary delayed.

We hope you will consider favourably our demand and we await your
reply.

Your truly

Achille Lauro
