

S.S. "ORMUZ".  
-----

I called on Mr. Veale of the Orient Line, and explained to him that the final reports on the steamer "ORMUZ" were in this Office, and that she would be classed 100A1 "Shade Deck" subject to draining arrangements from the spaces above the fore peak tank being fitted upon payment of the fees for which he had the account.

He stated that he had quite forgotten how the case stood and therefore wrote his letter of the 8th instant, but that he would place the matter before the Directors on Wednesday, 13th instant, when he anticipated they would give instructions for the fees to be paid.

I also took the opportunity to mention that although it was not made a condition of classification, the Committee suggested that it would be well for a stream anchor of 32 cwt. 2 qrs. to be supplied instead of the one of 20 cwt . 2 qrs. now on board.
