ANSR Ark'd. 14

SURVEYORS:

~~F. BROWN~~

BARTLETT. Dear Sir,

S. MANTELLI,

Surveyor, for Steel Testing.

With reference to the survey of the steamer "~~PRENESTE~~"

and to reports forwarded to-day regarding same we should like to point out : -

- 1) With regard to the proposed electric welding of the oil fuel tanks . -  
These tanks could only be partially examined as they were partly full of oil fuel but it appears that the scantlings of the stiffeners to the bulkheads are likely to be found to be considerably in excess of the Society's requirement as they are fitted with channel stiffeners about 15 ins. apart . -  
In the circumstances we have sent a copy of the enclosed letter to the Owners and hope shortly to forward a detail plan of the fuel tank together with our recommendations on the matter . -
- 2) Equipment . -  
The whole of the anchors and chain cable have been carefully examined and found to be in very good condition indeed . -  
As will be seen from the report these were all tested in America and the certificates state that they were tested by the American Bureau to British Corporation requirements . -  
As will be seen the weights of all the anchors and the cable are considerably in excess of the requirements and the rule tests appear to have been carried out . - In the circumstances it is submitted for consideration that these anchors and cables be accepted for the figure "I" for equipment . -
- 3) Number of decks . - The number of complete decks and tiers of beams is recorded as two because in way of No 1 hold and in the machinery space the deck below the upper deck is omitted . -

We are, Dear Sir,

Yours faithfully,

The Surveyors to Lloyd's Register

*Colin Bartlett*

Enclosure . - W1223-0142
