

Motor Vessel "ELBRUZ".

Oil Engines.

This vessel is fitted with twin screw Diesel engines of the four stroke, single acting type. There are 12 cylinders each 22" diameter and 39<sup>3</sup>/<sub>8</sub>" stroke.

The machinery has been constructed under special survey and in accordance with the approved plans and has proved quite satisfactory on trial at sea.

Three small high pressure air receivers which were not constructed under the survey of the Society's Surveyors, have been fitted, but new receivers which will be duly surveyed by a Surveyor to this Society are to be fitted on board in August.

There are two donkey boilers on board each fitted for oil fuel.

It is submitted that this vessel is eligible for the record of \* LMC 7.14 subject to three new air vessels being fitted in August.
