                 Carrying Petroleum        TS(CL) 9,28  
                 in bulk                              Oil Engine.

-----

The Modified Survey of the Oil Engines became due on this vessel in September last and the Donkey Boiler Survey, due 9,29, remains to be completed by the readjustment of the safety valves.

In reply to enquiry the Owners London Agents write that they have been informed from Moscow that as the vessel is classed with the Russian Register it is not considered necessary to maintain the class of this Society.

In the circumstances the Classing Committee, who had the case before them on Tuesday, 30th ultimo, decided to give instructions for the ship's character to be withdrawn from the Register Book and three dots (...) inserted in lieu thereof, indicating withdrawal of class at Owners' request.
