JACKSONVILLE, FLA. 27th October 1917.

The Secy.,  
London.

Dear Sir:-

Yours of 5th inst relative to twin screw barge "PEDRITO"  
The spacing of the rivets in the landing edges in way of the Molasses  
tanks were as shown on the approved plan. As this was the first Report  
I made I was not familiar with the procedure and may have omitted  
several important features through lack of experience.

I have received advice from the New York Office that  
the Fees have now been paid.

I am, Sir,

Yours very truly,

*Hugh L Boyle*
