

Liverpool

15th June 1904.

C. I. Davidson

Messrs. Hoeking & Co attend
at their works Liverpool, on the 14th
June 1904 and on following day for the
purpose of examining and testing
a feed water heater (Hoeking's Patent)
No 289 intended to be fitted on board a
vessel with Messrs. The Wallow & S. & S. Co
No 5936, engines.

This feed water heater was in the
presence of the undersigned subjected
to an hydraulic pressure of four
hundred pounds (400 lbs.) per sq. inch
and under this pressure both the shell and
the coils were found satisfactory.

Yours faithfully
C. I. Davidson.

C. I. Davidson.
