12th May, 1931.

OSLO.

"TELLO". I am in receipt of your memorandum of the 8th instant enclosing a translated copy of a letter which you have received from the Owner requesting that the completion of the Special Survey No. 3 may be postponed until November or December next when the vessel completes her present charter.

The Committee have given this case their careful consideration at their meeting today, and as no part of the Special Survey has been carried out they find it difficult to meet the Owner's wishes. As, however, in the circumstances mentioned by the Owner they are desirous of assisting him as far as possible, they will be prepared to consider the proposal further provided he will arrange to have the vessel drydocked and the underwater parts examined as part of the Special Survey at an early date, and also to complete the survey

of the Machinery at the same time, and opportunity be then taken to make a general examination of the hull. Subject to this being done and to a satisfactory report being received I have to say the Committee will be prepared to agree to the remaining items of the Special Survey being left over until November/December next as desired.

I have therefore to request you will be good enough to inform the Owner accordingly and let me know what steps are taken to carry out these requirements. In the meantime action has been deferred pending the receipt of a further communication from you.
