REC'D MAY 1 1916
AN82

16^a, Harima Machi,

Kobe, 25th March, 1916.

The Secretary,

London,

Dear Sir,

In reply to the inquiries in the classification letter of the 28th January relating to the steamer "DAIUN MARU No. 10" I beg to say that the butts of the flat keel plate are quadruple riveted as approved, not treble as entered in the report.

With regard to the stream and kedge anchors the tests were witnessed by me at the Kawasaki Dockyard and marked as shown in the copies of the anchor certificates forwarded with the report.

No certificate numbers were used for these two anchors but all certificates issued subsequently have been numbered.

I am, Dear Sir,

Yours faithfully,

A. L. Jones
