S.S.No.2-29

A Special Survey No.3, which became due on this vessel in May, 1932, after an early S.S.No.3, has been held, but in view of a considerable reduction in the thickness of shell plating in the cargo tanks as revealed by drillings taken at this survey, the assigning of the record of S.S.No.3 was deferred until a further examination was made of the vessel in dry dock and repairs carried out.

In reply to enquiry the Chief Surveyor for the U.S.A. & Canada writes, and forwards a letter from the Owners' Manager, intimating that it has been decided not to continue the classification of this vessel.

The case received the consideration of the American Committee on the 21st ultimo, when it was decided that the vessel's character should be withdrawn from the Register Book and Three Dots (...) inserted in lieu thereof, indicating withdrawal of class at Owners' request.

12th April, 1934.
