March 27th 1908

Roman & Co. Ltd.

the huller through.

At Craig Lough, 12th St. Michael St. Glasgow Survey the
S.S. "R. & H." of Glasgow in the headwinds of 1908.
Glasgow March 1908. To ascertain the nature and extent
of damage done to the huller through having
been used as a landing stage for 1908.

For further particulars see report.

Transmission found

Bottom plating slightly dented and
part scuffed off. No otherwise undamaged.

Recommendations

Bottom to be repaired, and to be run off
a coat of some kind of varnish internally and on the
top and the bottom of the inner surface of bottom plating
was found to be good and undisturbed.

These recommendations were made in order to place the vessel in
a good and efficient condition as she was in, before the damage
done.
