MANCHESTER.

17th October 1921.

A. H. S. LANE.

Messrs Hepples Ltd of South Shields. attend at the works of Messrs The Campbell Gas Engine Co. Ltd. of Halifax on the 14th October 1921. for the purpose of examining and witnessing the air pressure and hydraulic tests of two mild steel riveted air receivers intended for Motor Vessel No. 657.

The mild steel plates have been tested in accordance with the Society's Rules, and the receivers are made in accordance with the approved blue print.

The receivers were tested by air to 350 lbs per square inch and hydraulically to 350 lbs per square inch with satisfactory results and are suitable for a maximum working pressure of 200 lbs per square inch.

The receivers have been stamped LLOYD'S TEST 350 LBS with date and *ALS* for identification.
