NSD 23

# Lloyd's Register of Shipping,

"Hertzia," Packhusplatsen 2,

Gothenburg, 19th November, 1917.

The Secretary,

LONDON.

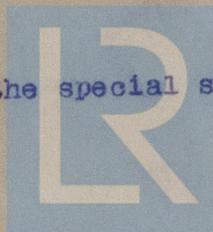

Dear Sir,

I beg to acquaint you that we have forwarded you under separate cover for the consideration of the Committee the plans in duplicate, three in number, relating to a steel screw steamer, designated yard number 206, proposed to be built by the Thorskogs Mekaniska Verkstad (P.Larsson) with a view to obtaining the 100A1 class in this Society's Register Book.

This vessel will be built in accordance with the plans approved for the same firm's S.S.No.202 on the 8th May 1916, which plans have also been forwarded for reference, except that a double bottom tank will be fitted amidship in the No.206 vessel.

The sketch of the proposed double bottom tank has been approved by me, as the Builders had no time to wait with the ordering of the material until a reply was received from the London Office.

A request form for the special survey of this vessel
