Carrying petroleum in  
bulk  
Fitted for o.f. F.P.  
above 150°F.  
-----

The First Special Survey No.3 became due on  
this vessel in March, 1934.

Action has been deferred from time to time,  
and when the case received consideration in April last, a  
proposal to extend the class for six months beyond the year  
of grace was agreed to.

In reply to enquiry the Owners state they  
understand the vessel is at present laid up at Curacao, and  
in view of the extensive repairs required for reclassification  
it has been decided not to repair her. They therefore request  
that the class may be withdrawn.

The Classing Committee had the case before them  
on Friday, the 1st instant, when in the circumstances they  
decided to give instructions for the vessel's class to be  
withdrawn from the Register Book and three dots (...) <sup>11,35</sup>  
inserted in lieu thereof, indicating withdrawal of class  
Owners' request.
