

REPORT ON "CAMOSUN" BY CAPT. SAUNDERS.

G. T. Legg, Esq.,
Manager.

I beg to report that on being appointed Master of the Steamer "Camosun," I proceeded to ship the derricks which were stowed on deck.

I found the fittings and rigging of the masts and derricks as provided by the builders were impracticable for working cargo, the blocks being so arranged and fixed without swivels that the falls would not lead to the winches without cutting the cheeks of the blocks.

The winch levers as arranged could not be worked by one man.

The alterations made by me were absolutely necessary to enable me to work cargo in and out of the holds.

(Signed) F. T. SAUNDERS,
Master SS. "Camosun."
