

LLOYD'S REGISTER OF SHIPPING.

PORT of B R E M E N.

27th August, 1931.

This is to Certify that G. H. C. B a h r
the undersigned Surveyor to this Society did at the request
of Messrs. Deutsche Schiff-und Maschinenbau A.G., Werk:-Act.
Ges. "Weser", Bremen, attend their works on the 31st July,
14th and 15th August 1931 for the purpose of inspecting and ★
testing the following parts of an exhaust turbine type 17,5-
150-80/7 made to the order of Messrs. C. Illies & Co., Hamburg,
and intended for Messrs. Mitsubishi Yard, Kobe:-

1. One change over flap, size 70
2. One main controlling valve
3. One Vulcan coupling
4. One primary coupling shaft.

These parts were inspected during construction and in
finished condition and were found to be, as far as can be seen,
sound and free from defects. The coupling tooth rim has been
made by Messrs. Ruhrstahl A.G. Henrichshuette, Hattingen, and
tested as required by the Rules. The primary coupling shaft
has been made by Messrs. Deutsche Schiff-und Maschinenbau A.G.,
Werk:- Act. Ges. "Weser". Certificate of test attached.

On completion the coupling has been tested by hydraulic ★
pressure to 8 kgs. per sq. cm. and was found tight and sound.
It has been stamped:- Lloyd's No.571. 8 kg. G.B. 15.8.31.

(Signed) Manager.
