Lisbon, 31st October, 1932.

LLOYD'S REGISTER
RECEIVED
-5 NOV 1932
LONDON

J. T. B. SCULLARD,
AND ENGINEER SURVEYOR.

S.S. "MOÇAMBIQUE"

Dear Sir,

I duly received your letter of the 28th instant with reference to the First Entry Report N^o.2201 on the above named Steamer.

I have to acquaint you that the shell rivets through the frames, edges and butts in the bilge and side plating up to and including the sheerstrake have been verified and found to be 7/8". The depths of tank margin plate, thickness of the collision bulkhead plating, and size of after peak bulkhead stiffeners were all measured and found to be as approved.

The dates of the last examination internally of the main boilers is as follows:- Starboard aft. 27-8-31; Port aft. 28-8-31; Starboard and Port forward, 3-9-31; Centre Forward. 9-4-32.

Screw shafts Port and Starboard examined 8-9-31.

Drains from N^o.4 lower 'tween deck port and starb. are not fitted with self closing valves since the pipes pass through the tunnel bulkhead and drain into a hat box in the recess in the hold, formed by the two tunnels and as shown on the pumping plan.

The Secretary,
LONDON

I am, Dear Sir,
Yours faithfully,

J. T. B. Scullard
