

MEMORANDUM

Steamer "SAPINERO".

Mr. Larg telephoned through this afternoon at 4.15 p.m. to say that this vessel will complete unloading some time tomorrow morning. So far as examined by him afloat, she shows evidence of leaking through the seams and rivets of the shell and at the deck.

I told Mr. Larg that Mr. French, Chief Surveyor for the United States and Canada, is at present in London and proposes to visit the vessel on Monday morning next, and I enquired whether the vessel would, in his opinion, be sufficiently available for survey then. He replied in the affirmative, excepting that, up to the present, there was a difficulty in obtaining a drydock.
