

NAGASAKI.

29th November, 1926.

R. Crawford.,

Messrs. Nagasaki Works, Mitsubishi Zosen Kaisha, Ltd., Nagasaki,  
survey the Turbines & Gearing, Makers No.426.

The Turbines & Gearing have been built under special survey in  
accordance with the approved plans and of tested material.

The Turbines & Gearing were tested on the test bed in Mitsubishi  
Shop at full revolutions under "no load" condition, and found to  
run satisfactorily.

These Turbines & Gearing are intended for Messrs. Uraga Dock Co.,  
No.317, & are eligible in my opinion for the notation  LMC  
when fitted on board.
