Port of BREMEN

10th August 1926.

This is to Certify that

P. A. Krützfeldt

the undersigned Surveyor to this Society did at the request of Messrs. Siemens-Schuckertwerke G.m.b.H. try and examine at their works at Nürnberg on the 5th August 1926 a compound wound direct current Generator No. 1825.571, Type GV 340/19 of 225 Volts by 356 Amperes rating and 350 revolutions per minute. This generator has been ordered for a Motor Ship being under construction at the works of Messrs. ~~Kobe Seikoshu~~ *Mitsubishi Iron Works* of Kobe for Messrs. Osaka Shojen Kaisha.

and No 434 (Nagasaki)

In the presence of the undersigned the Generator has been submitted to a trial under full working condition of five hours duration at rated full load. During and on completion of the trial the temperatures were measured at various spots by means of thermometers and the rise of temperature was found to reach in no case 35° C. The generator is overcompounded 5 % under conditions of constant speed and excitation. On completion the insulation has been tested and was found in order.

For identification it has been stamped:-
