

PUMPING ARRANGEMENT Endorsement.

Shipbuilders: Messrs. *S/S "FRATERNITAS"*

Yard No.

Engineers: Messrs.

Engine No.

Owners: Messrs.

W133-0076

It is submitted that the plan of
Pumping Arrangement *for trimming tanks aft*
merit approval, provided the arrangements be as
shown and amended on the plan and the remaining
requirements of Sections ~~20 and~~ 34 of the Rules (1935-6)
be complied with so far as they are applicable.

*It is noted that fresh water is to be carried in the
trimming tanks shown on the plan, and that the
suction pipes of these tanks are connected to the
after peak tank suction pipe. In view of the
latter tank being adjacent to a cargo oil tank,
the Surveyor should satisfy themselves that the after
peak tank is not intended ~~to carry~~ boiler feed water
or drinking water & that, if the fresh water in
the trimming tanks is intended for these
purposes, the pipe connections are such that
contamination of the fresh water with oil or oily
water, cannot take place*

Return/plan.
