E.

Dear Sirs,

I duly received your letter of the 16th instant with enclosures advised therein respecting the s.s. "FRATERNITAS", and with regard thereto I have to inform you that the plan of manhole fittings for the Hartmann Extractor will be approved for a working pressure of 70 lb. per sq. inch, provided the manhole fittings be constructed under the usual conditions of survey and testing to your entire satisfaction.

I may add it is concluded that the longitudinal seam of the 1100 mm. diameter branch is welded, but I shall be glad if you will let me know if this is so.

I think it well to draw your attention to the cast steel clamp which it is considered should be seated on the full width of the angle flange.

One copy of the plan now approved is returned herewith.

I am, Dear Sirs,

Yours faithfully,

Lloyd's Register  
Foundation  
Secretary.

The Surveyors,

COPENHAGEN
