Shipbuilders: Messrs.

Yard No.

Engineers: Messrs. A.B. Gotaverken

Engine No.

Whale oil apparatus

It is submitted that the plan of manhole fittings for
Hartmann Extractor merits approval
 for a working pressure of 70 lbs./sq.
 provided the manhole fittings be constructed under
the usual conditions of survey and testing to the
entire satisfaction of the Surveyor.

It has been concluded that the longitudinal
seam of the 1100 mm. diameter branch is welded
but this should be confirmed.

The Surveyor's attention should be drawn to
the cast steel clamp which it is considered
should be sealed on the full width of the angle
flange.

Return plan.

Retain copy.
