

URGENT

"SIR JAMES CLARK ROSS" ex "MAHRONDA".
PRESS WHALE OIL BOILERS.

A plan of whale oil boilers was recently approved in the case of the S.S. "BAS 2", and duplicate plans for the above vessel are now submitted.

The Makers state they have received materials for these boilers, and therefore desire to have the end plates approved as in the case of the S.S. "BAS 2". *(see attached end plate)*

It is submitted that as in the previous case the material might be accepted, provided the results of the tests are satisfactory, and the thickness of the end plates might be approved.

Further, the plan of boilers merits approval for a working pressure of 60 lbs. per square inch, provided the boilers be constructed under the usual conditions of survey and testing.

Return 2 copies of each plan and retain 1 copy for reference.
