

(COPY)

ALK/BT.

August 28/20.

Messrs. Cockrane & Sons, Ltd.,  
Onse Shipyard,  
Selby.

Dear Sirs,

Vessel No. 741, Engine No. 3185.  
-----

We regret to report that the L.P. cylinder for the above has turned out slightly defective in the bore, being porous for a short distance, but the material adjacent to the porosity is perfectly sound, and we do not think this is any detriment to the cylinder, further the cylinder has stood the water test, Lloyds, however, do not wish to accept the cylinder unless the Owners are agreeable and we shall therefore be glad to know when a representative of the Owners is likely to be in this country.

To minimise delay we are using in the L.P. cylinder for vessel No. 742 (3186)

Yours faithfully,

**For AMOS & SMITH LTD.**
