

S.S. "WELLFIELD".

The case of this vessel is fully stated in the endorsement dated 26th June.

The vessel has since arrived in the Tyne, and the owners state that while the repairs are in progress it is proposed to take the opportunity to carry out the Special Survey No. 2.

The vessel was built in 1924 - 3 mo., and the Survey question will ~~therefore~~ become due at the end of March 1932, and the Owners' proposal is therefore in order.

With regard to the question of lengthening, the vessel 24'-3", plans have been submitted by Messrs. Curchin & Watson, on behalf of the Owners, as mentioned, and have been approved, but it is noted from the Owners' letter that the question of lengthening has not been definitely decided.
