Port

NEWCASTLE ON TYNE.

28th April 1932.

M.V. WELLFIELD
NEWCASTLE ON TYNE.
Report No. 87999

This is to Certify that

ALEXANDER E. STEVENSON,

the undersigned Surveyor to this Society did at the request of the Owners' Representative, of the m.v. "WELLFIELD", 6054 tons gross, of Newcastle, attend on board the vessel whilst in dry dock at Messrs. Smith's Dock Co. Ltd., North Shields, on 17th August 1931 and subsequent dates, to ascertain the nature and extent of damage stated to have been sustained in machinery space through vessel grounding in Black Sea, 25th February 1931 and subsequent submersion. For further particulars please see Log Books :-

FOUND.

RECOMMENDED.

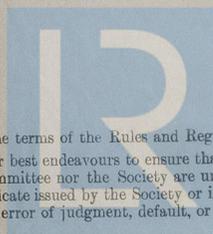

After removal of engines a large number of defective rivets were noted in engine seatings.

Engine seatings to be hammer tested and all defective rivets to be renewed.

The Engine Room tank top plating was found pitted in several places.

Fittings to be cleaned out and plating built up by means of electric welding.

These recommendations were made in order to place the vessel in as good and efficient condition as she was in before the alleged casualty occurred.
