

m.v. "ANNELIESE ESSBERGER"

It is submitted the Hamburg Surveyors be informed that from the calculations made in this Office it would appear that the calculated stress in the standard hogging condition is about ^{8.0} 80 tons/in², a figure which is considered to be quite reasonable for a vessel of this size and type.

A copy of Mr. Ripley's report on his examination of the steel might be forwarded ~~for the~~ for the information of the Surveyors.

The plans Nos. 13, 14 and 15 should be returned as requested.
