

Extract from a letter received from the Surveyor at Cadiz  
dated 24th March 1923.

"With regard to the First Entry reports of the steamer  
"MANUEL ARNUS", a few items such as watertight doors, hand  
pumps and one length of intermediate shafting still require  
attention, but as the vessel is due to sail on the 4th April  
next it is hoped to despatch the reports early next month."
